Reprints of individual articles are available only from the authors.

It is a condition of publication in the journal that authors assign copyright to the Association of Schools of Public Health (ASPH). This ensures that requests from third parties to reproduce articles are handled efficiently and consistently and will also allow the article to be as widely disseminated as possible. Although assigning copyright, authors may use their own material in other publications provided that the journal is acknowledged as the original place of publication and Oxford University Press is notified in writing and in advance.

Material published in this journal may be used, modified, reproduced, and distributed by the US Government for Government purposes.

Public Health Reports is printed on acid-free paper that meets the minimum requirements of ANSI Standard Z39.48-1984 (Permanence of Paper).

Oxford University Press is a department of the University of Oxford. It furthers the University's objective of excellence in research, scholarship, and education by publishing worldwide.

IN UPCOMING ISSUES

Counting the Uninsured

CAROLYN TURNER

Hospital data on appendectomy and heart attack patients may predict trends in lack of health insurance coverage.

Pollution Exposure and Hospital Asthma Admissions

ERIC NAUENBERG

Low family income level may be a better predictor of poor access to primary care than lack of insurance.

Hepatitis A: Response to Outbreaks

MEHRAN S. MASSOUDI

Is good hygiene enough to prevent the spread of hepatitis A from an infected foodhandler?

High Risk Travel

Scenes such as this dramatic aerial shot at the site of a snowmobile accident in Alaska are becoming more common in northern areas with increasing snowmobile use. Injury control strategies have not kept pace with the growing popularity of snowmobiles. Is it time to rein in the unfettered freedom of snow travelers in order to protect them from the higher risk of injuries and deaths associated with alcohol intoxication, lack of helmet use, and the dearth of safety training? See page 42-53. ■
